SUMMARY

Results-driven DevOps and Cloud Engineering leader with 8 years architecting and operating scalable, secure, high-availability systems across AWS, GCP, and Azure. Lead a team of 5 and own infrastructure across an AI/ML product portfolio, driving CI/CD automation, GitOps, and reliability. Built agentic DevOps (AIOps) assistants for alerting, root-cause analysis, incident resolution, and cost optimization, and delivered an internal Developer Platform now in beta. Known for cutting toil, hardening security, and translating business goals into resilient systems while mentoring engineers.

CORE SKILLS

CI/CD & GitOps: ArgoCD, GitHub Actions, Jenkins, GitLab CI, Azure DevOps, Bitbucket Pipelines

IaC & Platform: Terraform, Terragrunt, Crossplane, Ansible, Chef; Internal Developer Platforms (IDP), Backstage, Self-Service Infrastructure

Containers & Orchestration: Docker, Kubernetes, GKE Autopilot, Amazon EKS, Helm

AI & MLOps: Agentic AI / AIOps, LLMs, Small Language Models (SLMs), Amazon Bedrock, Azure AI Foundry, Vertex AI, Hugging Face, Kubeflow

Cloud — AWS: EC2, S3, VPC, EKS, ECS, RDS, Lambda, IAM, API Gateway, SQS, SNS, CloudWatch, CloudTrail, Bedrock, SageMaker, CloudFront

Cloud — GCP: GKE, Cloud Run, Vertex AI, BigQuery, Cloud SQL, Compute Engine, Cloud Build, VPC

Cloud — Azure: AKS, VNET, AI Foundry, Cosmos DB, Key Vault, Blob Storage, Databricks, App Service, API Management

Observability: Prometheus, Grafana, Loki, Promtail, ELK, Nagios, Datadog, New Relic

Languages & Data: Python (Boto3), Bash, React, Flask, FastAPI; PostgreSQL, MySQL, MongoDB, ScyllaDB, Neo4j

Security & Practices: Least-Privilege IAM, AWS WAF, AWS Secrets Manager, ORCA, Upwind, SRE, ITIL, Disaster Recovery

PROFESSIONAL EXPERIENCE

Indexnine Technologies Pvt. Ltd.

Pune, India

Lead DevOps Engineer

Mar 2025 – Present Scope: Lead 5 engineers; own the in-house Developer Platform and

infrastructure across most of Indexnine's AI/ML product portfolio.

- Built a suite of agentic DevOps (AIOps) assistants — automated alert summarization, incident root-cause analysis, a resolution-suggestion agent, a cost-optimization advisor, and a CI/CD troubleshooting agent — reducing on-call toil and accelerating incident response.
- Designed and delivered an internal Developer Platform (IDP), now in beta, standardizing self-service provisioning and deployment with Backstage, Crossplane, ArgoCD, and GitHub Actions on Kubernetes.
- Engineered pipelines to deploy Small Language Models (SLMs) into a client's internal summarization product, with standardized packaging, rollout, and versioning.
- Designed and deployed scalable, multi-tenant infrastructure for an AI test-generation product (TMAP-based) serving multiple enterprise customers.
- Deployed custom Hugging Face transformers on Cloud Run (2nd-gen), achieving sub-second cold starts and a 40% cost reduction versus persistent GPU instances.
- Migrated microservices to GKE Autopilot, reducing operational overhead and improving scalability.
- Built end-to-end MLOps workflows with Vertex AI Pipelines (Kubeflow SDK), automating ingestion, training, and evaluation for production models.
- Led PostgreSQL migration from EC2 to Amazon RDS, cutting maintenance workload by 75% and improving uptime with automated backups and scaling.
- Hardened security and resilience — least-privilege IAM, AWS WAF, AWS Secrets Manager, and a cross-region S3 disaster-recovery roadmap.
- Drive pre-sales DevOps strategy for prospective clients, including architecture recommendations and FTE/effort estimation for new products.

One2N Consulting Pvt. Ltd.

Pune, India

Site Reliability Engineer

Jan 2025 – Mar 2025

- Managed and optimized Amazon EKS clusters for high availability and security, and built Kubernetes clusters from scratch on bare-metal servers.

- Authored reusable Helm charts and standardized Kubernetes deployments following best practices.
- Implemented comprehensive observability with Prometheus, Grafana, Loki, and Promtail for proactive monitoring and troubleshooting.
- Designed CI pipelines with GitHub Actions and Azure DevOps for automated testing and deployment.

Talentica Software India Pvt. Ltd.

Pune, India

Lead CloudOps Engineer (Project: Digital Turbine)

Nov 2019 – Jan 2025

- Led a team of Cloud Ops engineers operating a global GCP advertising platform managing 3000 servers, improving performance and reducing hosting costs.
- Automated complex GCP infrastructure with Terraform and Terragrunt, and managed CI/CD of GKE clusters using ArgoCD.
- Migrated applications to GKE Autopilot and implemented ITIL incident and change management practices.
- Integrated the ORCA vulnerability scanner; wrote Python Lambda functions for CloudWatch alerts and S3 object notifications.
- Monitored production with Nagios, Prometheus, Grafana, and Bash scripts; maintained Kafka/ZooKeeper clusters and Dockerized all applications.

Admaxim India Pvt. Ltd.

Pune, India

Linux System Administrator

Jul 2018 – Nov 2019

- Provisioned and bootstrapped EC2 fleets (Linux, Ubuntu, RHEL, Windows) via shell scripts for consistent deployments.
- Configured Elastic Load Balancers and Auto Scaling Groups for a fault-tolerant, cost-efficient, highly available environment.
- Implemented least-privilege IAM with MFA and S3 lifecycle policies; automated CI with Rundeck, Ansible, and shell scripts.

EDUCATION

Bachelor of Engineering, Computer Science

2017

Savitribai Phule Pune University (Sanjivani College of Engineering, Kopergaon)

CERTIFICATIONS

AWS Certified Solutions Architect – Professional | HashiCorp Terraform Certified Associate | Red Hat Certified System Administrator (RHCSA) | Red Hat Certified Engineer (RHCE) | Certified Ethical Hacker (CEH)
